

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CHICAGO.  
L. SCHICK, Publisher.

1888.  
No. 1.

A  
DICTIONARY  
OF THE  
ENGLISH AND VOLAPÜK  
LANGUAGES.

BY  
JOHN REILLY

---

CHICAGO  
L. SCHICK Publisher  
1888

NEW  
YORK  
PUBLIC  
LIBRARY

Entered according to act of Congress, in the year 1888, by  
LOUIS SCHICK,  
in the office of the Librarian of Congress, at Washington.

This Dictionary was originally intended as a reprint of Seret's Volapük Dictionary.—It is this however only in the beginning pages, it having otherwise been carefully revised and compared with Schleyer's works.

# THE CONVENTIONAL LIES OF OUR CIVILIZATION.

FROM THE GERMAN OF MAX NORDAU.

---

## OPINIONS OF THE PRESS.

THE SPECTATOR, LONDON. In "The Conventional Lies of Our Civilization," we have an excellent American translation of the seventh edition of a work by Max Nordau, which has been officially proscribed in Austria. The author, who holds that the world is utterly out of joint, believes the discontent and pessimism everywhere prevalent to be due to the perpetual conflict between our secret convictions and our outward life. This inconsistency he treats under its various forms—the lies of Religion and of a Monarchy and Aristocracy, political, economic, matrimonial, and miscellaneous lies. If we admit his premises, as no reasonable Englishman will, that all cultivated people, consciously or unconsciously, accept the Materialistic theory of the Universe, then no doubt it must be allowed that there is a vast amount of self-deception afloat. Apart from this, he deals some telling blows at obvious anomalies in our civilised societies in a trenchant fashion, and with the aid of a style far more incisive and epigrammatic, even in the translation, than we expect to find in a German writer. But many of his onslaughts lose their point to an English reader. His sketch of political life is obviously drawn from his experiences of American professional politicians; and his picture of the galling restrictions of bureaucracy, under which the working classes suffer, may be true of Germany, but is a gross caricature of England. Finally, we would point out that his panaceas for the evils—physical, social, and economic—of civilised humanity, are partly Utopian, and mainly consist of a revolution in the land system, on conditions under which the purely physical excellence of the race would have the freest development. Now, the logical outcome of the evolution theory, in which he firmly believes, precludes the possibility of our ever reverting to such a regime of "physiocracy" as he describes. And Herr Nordau is by way of being nothing if not logical. Nevertheless, though more successful in the destructive than the constructive portions of his book, he in both compels our respect, though seldom our assent, by the sincerity and earnestness with which he propounds his views, even when they are most startling.

*Price: Paper, 50 Cts. Cloth, 1.50. Mailed, postpaid, on receipt of price, by the publisher,*

L. SCHICK, 128 & 130 LAKE ST., CHICAGO.

## THE CONVENTIONAL LIES OF OUR CIVILIZATION.

### OPINIONS OF THE PRESS.

PHILADELPHIA RECORD. This is a most powerfully written book. It is strong meat, and should be avoided by weak stomachs. Strong ones may not be able to digest the whole of it, but that portion which they assimilate will assuredly rise to the brain, and bear fruit in an internal cry against some of the conventional lies of our civilization. \* \* \* \* Every thoughtful, right-minded man and woman must agree with Mr. Nordau in his denunciations of marriages de convenance, now so universal, and in his assertion, that love should be the only incentive to marriage. \* \* \* \* Such works have their uses. They do not cause revolutions. On the contrary, by drawing attention to existing abuses, before they have become unbearable, they may prevent them.

TROY TIMES. It is a pretty severe arraignment of about all the faults and frailties of government and society, and is written by a gentleman who has command of a superb flow of language. There is a great deal in it to stimulate thought and arouse the moral susceptibilities.

CHICAGO INTER-OCEAN. The style of the writing is vigorous and clear, and its truths too clearly stated to be called in question.

DAILY PRESS, ALBANY, N. Y. The volume before us is a study. It is a sturdy, plain, practical expose of a thousand fallacies under which the world is laboring. Its logic is unanswerable, its statements mainly beyond question.

CHICAGO TIMES. \* \* \* \* The most striking feature of the book is its audacity. It is thoughtful and keen-sighted, but this is not its salient feature. Others have thought and seen much the same thing. Almost any cultivated reader will find it after voicing his own secret thought. But its boldness is startling. There is not the faintest show of hesitation or faint-heartedness in attacking the most firmly seated institutions of civilization—marriage for example. It should be said, however, that in treating of this subject it is marriage as organized in European countries that furnishes the theme. Of the methods of marriage in this country he says nothing—probably knows nothing. In Europe it is largely an institution of social classes, of business or estate partnerships, etc. In this country it is a matter pretty much of caprice, of personal fancies—often mistaken. Our system is the natural reaction from the other—the opposite extreme of the pendulum's swing—and both are open to severe attack.

## THE CONVENTIONAL LIES OF OUR CIVILIZATION.

—O—

### OPINIONS OF THE PRESS.

THE JUNIOR LIBERAL REVIEW, LONDON. The writer of this work is an iconoclast, or, as the dictionaries put it, "a breaker of images." He is of the coterie of thinkers to which Southey in his "Vision of Judgment" gives the appellation of the "Satanic School." The title is a strange one, but the work is still stranger, being in reality a wholesale and unsparing condemnation of the state to which mankind, after eighteen centuries' struggling and stumbling, has arrived. Nothing escapes the censure and satire of the author's pen. Religion, politics, society, the press—all the institutions of our day, whether they be of advanced America or retrograde Russia, whether they be relics of the old or products of the new, decaying or developing, are scoffed at by the author as "lies," which must be exorcised from the world. Brilliant, pungent, and profound, displaying powers of discerning insidious evil where good alone is supposed to exist, M. Nordau, notwithstanding, chills the feeling, and alienates the sympathy of his reader by the extravagance and morbidness of his unhealthy pessimism. Characterized by a strange fervidness and force, pervaded by an enthusiasm which if it resembles fanaticism in the dogmatism of its denunciation, is at any rate the outcome of an analytical study of the things against which it is directed, the book weakens its title to be regarded as the work of a true reformer by the licentiousness of its language. But while few will think our modern civilization deserving of the philippic the author has directed against it, the work is both valuable and interesting as giving us in a succinct form all that can be said against existing institutions and the principles which they embody, and said, too, with a power and incisiveness of expression which will make it a matter for surprise, if they do not cause it to become a world-known book. If we recoil from the miasma of pessimism to which M. Nordau invites us we can at any rate profit by his vigorous and searching inquiry into the evils from which the world is suffering. And absurdly pessimism, whether it be religious or political, had never a more talented exponent than the author of this work.

WASHINGTON POST. It is a work that will command attention and inquiry, the world over.

INDIANAPOLIS NEWS. It discusses the falseness of the existing social, political and economic institutions in a manner at once interesting and audacious, at times extremely radical.

## THE OVERLAND LIBRARY.

17 Nos. annually: 25 cents per number; \$4.00 per year.

---

### OPINIONS OF THE PRESS.

DAILY NEWS, CHICAGO. These two collections are designed chiefly to furnish students of the German language with interesting reading from good authors and with English translations of the selections chosen. The "Collection Schick" includes the German originals, and the "Overland Library" the translations, and it is designed to issue the successive numbers of both collections at intervals of three weeks. The translations of course make a side bid for the support of English readers, who will find some of the choicest things in recent German prose presented to them. The first number contains three stories by Rudolf Lindau, and the second two by Fanny Lewald. The neatness of these books and the excellence of their typography are especially noticeable, and their whole appearance is very attractive. The German series is published at 20 cents a number or \$3 a year.

ST. PAUL AND MINNEAPOLIS PIONEER PRESS. L. Schick, a Chicago publisher, has hit upon an excellent and agreeable method of studying either German or English, for which he proposes to furnish material by publishing in simultaneous and separate pamphlet form stories and sketches by standard German authors in the original and in English translation. The student of either language is supposed to possess both volumes, and when he finds a word or sentence he don't understand he can make references to the "pony" volume and go on his linguistic way rejoicing.

INTER-OCEAN. The Overland Library. Two numbers of neatly printed paper-bound series reach us from the publishing-house of L. Schick, Chicago. They are made up of novels, sketches, and humorous stories by the best modern authors, printed both in English and German. The idea of the publication is to teach German or English by an alternate or combined use of the two series. It is claimed that the student will thus master the language much more rapidly than by reading with the dictionary. The stories and sketches of the numbers are well calculated to interest young readers, and are of a high order of literary merit. "Hans, the Dreamer", "All in Vain", and "First Love", from the German of Rudolf Lindau, make up the first number. The plan has called out the commendation of educators and others of good judgment as to its real value. To those who have a passable knowledge of the grammar of either language it undoubtedly will prove of real benefit for rapid progress in mastering the language.
